

Failure to Submit Initial Inventory to the State

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Reporting Requirements Not Met for Ponderosa Village MHP (GA3050023)

(Water System Name and WSID)

We were required to develop and submit to the State an initial Service Line Inventory that includes all service lines connected to the public water distribution system and characterize the materials of those service lines as either lead, galvanized requiring replacement, non-lead, or lead status unknown. Our system failed to submit an initial inventory of service lines to GA EPD by October 16, 2024.

Although the failure to report the initial inventory to the State does not create a risk to public health, we are required to inform you of this violation and provide additional information including what we did to correct the situation.

What Should You Do?

There is nothing you need to do at this time. You do not need to boil your water or take other actions. Remember, boiling water does not remove lead from water.

For more information on reducing lead exposure around your home/building and the health effects of lead, visit the EPA's websites at <https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water> and <http://www.epa.gov/lead>.

What Is Being Done? [Describe your corrective actions including when your water system expects to return to compliance or resolve the violation. For examples of corrective actions language, see the included PN Instructions.]

We did NOT find any service lines in the park that contained lead, galvanized, or unknown service lines during our visual inspection on May 13, 2026, all service lines in the park were determined to be made of PVC pipes. On May 13, 2026, the Service Line Inventory for this park was completed, uploaded to 120 Water, and submitted to EPD. The Georgia EPD has accepted the J&M Rentals Service Line Inventory. You can contact James Mehaffey, Jr. to obtain a copy of the Service Line Inventory.

For more information, please contact James Mehaffey, Jr., Owner (904) 710-9565.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
